(Signature of Applicant) **

(Name of Applicant, typewritten or printed)

Applicant's Position or Title

* Attach 2 prints of your plans.
** Must be signature of applicant, not that of agent, attorney or engineer.

4.3 Application For Conceptual Review - Form A

An application describing the proposed residential, commercial, or industrial development, or other project, shall be submitted to the Authority with supporting data to determine the economic and technical feasibility of extending sewer service. This application shall be submitted concurrent with filing of conceptual sub-division or site plan application with the East Brunswick Planning Board or Zoning Board. The Authority may defer or waive certain parts of this supporting data at its discretion where the cost of data preparation is excessive for the development or project planning and approvals.

In addition to the application, the Applicant shall furnish two (2) copies of a general location plan (min. scale 1" = 100') showing streams, streets, lots, blocks, and tax map numbers, copy of application submitted to the Planning Board, location of any existing water distribution and/or sanitary systems in the area, proposed system outline and route of construction, and estimated quality and volume of flow. Elevations shall be based on mean sea level, or the Township datum.

The Authority shall analyze the submitted application and supporting data and report to the Applicant the Authority's recommendations and/or findings. These findings may be furnished to the Township Planning or Zoning Board as support material.

If the Authority determines that portions of the existing downstream system do not have sufficient capacity to accept flow from the proposed development, then the Authority may require payment for, or the construction of, supplementary off-site facilities to accommodate the additional flow. Costs shall include all engineering and overhead costs.
